## SOFTWARE DEVELOPER

---

Job level: Middle/Senior

### Windows Scripting/SysAdmin Tools Developer

The Software Developer in ACROM is responsible for analyzing, designing, coding, testing and supporting various internal script-based tools that will be used, in conjunction with other/existing specialized programs, by infrastructure teams to automate several deployment and configurations tasks. Reporting, logging and auditing are among the features that such tools will need to possess.

### RESPONSIBILITIES

- Develop, test & support scripts that automate deployment and remote configuration of various software product across a larger infrastructure landscape.
- Take ownership and continue development and support of existing script-based tools.
- Collaborate with the web-application team and work to build new software products that require scripting.
- Periodically survey opportunities for automation of various infrastructure deployment and other internal business activities within ACROM and/or among ACROM's client's base.
- Design adequate solutions/software architectures to develop necessary tools for the needs.
- Manage version control over each of the portfolio of tools developed.
- Develop test scripts and manage test & production environments.
- Communicate and document releases of the tools.

### IDEAL CANDIDATE

The ideal candidate will have a good background in windows common scripting languages (VBScript, PowerShell and the classic batch/cmd scripting). Also, the candidate is flexible and willing to adopt, learn and use any other software development/scripting languages as the situation may demand, including, but no limited, to Linux scripting (bash), VBA (Excel macros), etc. with little to no supervision. Ability and willing to learn independently is a must.

### Job Qualifications

- Good knowledge of VBScript, PowerShell, classic batch/cmd scripting;
- Familiarity with Windows-based environments;
- Interest in learning new technologies as the context/clients may demand;
- Organizational skills and ability to multi-task;
- Ability to communicate in an understandable, polite and friendly manner, both written and verbal;
- English language –spoken/written

Will be considered a plus:

- JScript familiarity or knowledge.
- VBA knowledge.
- Familiarity with modern web-application languages, tools and frameworks (PHP/MySQL/JS)
